

ELSEVIER

Volume 96, issue 4, November 2009

CONTENTS

EARTH-SCIENCE

REVIEWS

The international geological journal bridging the gap between research articles and textbooks

(Abstracted and indexed in: Geo Abstracts, Current Contents, Bulletin Signalétique, AGI's Bibliography, Index of Geology, Physics Abstracts and INSPEC). Also covered in the abstract and citation database SCOPUS®. Full text available on ScienceDirect®.

Review Papers

Sediment supply: The main driver of shelf-margin growth	
C. Carvajal, R. Steel and A. Petter	221
Neogene and Quaternary coexisting in the geological time scale: The inclusive compromise	
B. McGowran, B. Berggren, F. Hilgen, F. Steininger, M.-P. Aubry, L. Lourens and J. Van Couvering	249
Tsunami sediments and their foraminiferal assemblages	
B. Mamo, L. Strotz and D. Dominey-Howes	263
Global Miocene tectonics and the modern world	
P.E. Potter and P. Szatmari	279
Orogenic evolution of the External Dinarides in the NE Adriatic region: a model constrained by tectonostratigraphy of Upper Cretaceous to Paleogene carbonates	
T. Korbar	296
Late Quaternary hydrological dynamics in the Middle Kalahari: Forcing and feedbacks	
S.L. Burrough, D.S.G. Thomas and J.S. Singarayer	313
"Late Quaternary lacustrine paleo-seismic archives in north-western Alps: Examples of earthquake-origin assessment of sedimentary disturbances"	
C. Beck	327
Contents volume 96, 2009	345
